Education

Adani University

July 2023 – July 2027

B.Tech. in Computer Science and Engineering

- CGPA: 7.73/10
- **Coursework:** Database Management Systems (DBMS), Operating Systems, Data Structures and Algorithms, Object-Oriented Programming (OOP), Computer Networks, Machine Learning, Distributed Computing, IoT

Skills

Languages and Frameworks: TypeScript, Python, Next.js, React, JavaScript, Java, Flask, SQL, C++, REST APIs

Tools: Git, GitHub, Linux, Docker, Google Cloud Platform (GCP), Azure, CI/CD, Zsh, Agile, SDLC, PostgreSQL, Drizzle ORM, Turborepo, Message Queues

Projects

Hive

- Architected a Turborepo-based, multi-tenant headless CMS with workspace RBAC, team invitations, and a versioned, API-key-authenticated public REST API.
- Published **hive-cms**, a type-safe Node.js SDK on npm that gives client applications typed API access without hand-written HTTP requests.
- Added Gemini-assisted TipTap tools for tone, grammar, rewriting, and content analysis with encrypted bring-your-own-key storage.
- Built presigned Cloudflare R2 media uploads with asynchronous Azure Functions thumbhash generation.
- **Tech:** TypeScript, React 19, Vite, TanStack Query, TipTap, Radix UI, Tailwind CSS, Express 5, Drizzle ORM, PostgreSQL, Turborepo, Azure Functions.

Vessel

- Engineered an event-driven audio pipeline using direct presigned R2 uploads, Azure Service Bus, and KEDA-autoscaled Container Apps Jobs that scale from zero.
- Replaced polling with queue-driven FFmpeg transcoding across four HLS renditions, including retries, abandon semantics, and dead-letter handling.
- Shipped authenticated worker callbacks, scheduled orphan-job cleanup, and adaptive-bitrate hls.js playback with in-player quality switching.
- **Tech:** TypeScript, Next.js, ElysiaJS, Better Auth, Azure Service Bus, Azure Container Apps Jobs + KEDA, FFmpeg, Cloudflare R2, PostgreSQL (Neon), GitHub Actions/GHCR.

Platform1

- Built an anonymous community platform with topic boards, content discovery, voting, moderation workflows, and ranking algorithms.
- Designed a Next.js, ElysiaJS, and Neon Postgres architecture with secure authentication, RBAC, real-time interactions, and scalable administrative tooling.
- **Tech:** TypeScript, Next.js, ElysiaJS, Neon Postgres, Drizzle ORM, Redis.

Retaliate

- Implemented a React-like library with Virtual DOM, Fiber reconciliation, incremental rendering, and custom DOM diffing.
- Built the renderer and reconciliation lifecycle, then added JSX support via esbuild with a hot-reload development server and production build pipeline.
- **Tech:** JavaScript, esbuild.

Leadership and Achievements

President, Adani Student's Programming and Development Club (ASPDC)

Aug 2024 – Present

- Lead technical events, workshops, community programs, and student mentoring in software development, version control, and project planning.

Git/GitHub and Web Development Workshop Instructor

Aug 2025 – Sept 2025

- Led a three-hour Git/GitHub workshop and a full-day HTML, CSS, JavaScript, and responsive web development bootcamp.

Winner, Techathon 2025

Jan 2025

- Won first place for Roadsafe, a real-time accident reporting and community awareness platform built during a 24-hour hackathon.
