Education

Adani University

July 2023 – July 2027

B.Tech. in Computer Science and Engineering

- CGPA: 7.73/10
- **Coursework:** Database Management Systems (DBMS), Operating Systems, Data Structures and Algorithms, Object-Oriented Programming (OOP), Computer Networks, Machine Learning, Distributed Computing, IoT

Skills

Languages and Frameworks: TypeScript, Python, Next.js, React, JavaScript, Java, Flask, SQL, C++, REST APIs

Tools: Git, GitHub, Linux, Docker, Google Cloud Platform (GCP), Azure, CI/CD, Zsh, Agile, SDLC

Projects

Hive

- Built a multi-tenant headless CMS for structured content and metadata with clean, framework-agnostic REST API access.
- Redesigned system architecture for clearer schema modeling, reliable CRUD operations, and improved developer experience.
- Implemented content models, revision tracking, metadata pipelines, and technical documentation.
- **Tech:** TypeScript, React, ShadCN, TailwindCSS, Express.js, PostgreSQL, Drizzle ORM.

Retaliate

- Implemented a lightweight React-like library with a Virtual DOM, Fiber reconciliation, and incremental rendering architecture.
- Added JSX support via esbuild, along with a hot-reload development server and production build pipeline.
- Built custom renderer logic, diffing algorithm, and core DOM reconciliation for frontend performance optimization.
- **Tech:** JavaScript, esbuild.

EveryNyan

- Built an anonymous social platform for students to share thoughts with privacy-first design and real-time updates.
- Created smooth posting, interaction, and feed rendering flows using a clean, responsive user interface (UI).
- Achieved over 120 active users within the first month of launch.
- **Tech:** TypeScript, React, Next.js, Firebase.

Roadsafe

- Built a mobile-first web platform for reporting accidents and hazards with real-time updates.
- Designed a fast, minimal UI optimized for emergency use cases, accessibility, and quick reporting workflows.
- Developed during Techathon 2025 as a complete 24-hour hackathon project.
- **Tech:** TypeScript, Next.js, Supabase.

Leadership and Achievements

President, Adani Student's Programming and Development Club (ASPDC)

Aug 2024 – Present

- Leading ASPDC initiatives, managing technical events, workshops, and community programs that support software engineering and developer growth across the university.
- Mentoring students on real-world software development, version control best practices, and project planning.

Git and GitHub Workshop Instructor

Sept 2025

- Conducted a three-hour hands-on workshop teaching Git fundamentals, GitHub workflows, branching strategies, pull requests, and collaborative development.

Web Development Bootcamp Instructor

Aug 2025

- Delivered a full-day bootcamp covering HTML, CSS, JavaScript, responsive web design, and core modern web development foundations for beginners.

Winner, Techathon 2025

Jan 2025

- Secured first place for building Roadsafe, a real-time accident reporting and community awareness platform developed in a 24-hour hackathon under rapid prototyping constraints.
